

2014 AHSAA Policy – “Drones”

The AHSAA has adopted a policy regarding the use of “Drones” prior to or during an interscholastic contest between member schools.

The use of “Drones” for any athletic purpose inside the confines of a building is strictly prohibited at all times.

The use of a “Drone” at an outdoor interscholastic contest may be used but must remain outside the field of play at all times. It also cannot be flown over an area where spectators (people) are gathering or sitting prior to or during an interscholastic contest.

The host school of any interscholastic contest between member schools has the authority to prohibit the use of “Drones”.

The use of “Drones” may at anytime be prohibited by the contest officials if the contest officials determine that the “Drones” would cause an unreasonable risk or distraction.
